DETAILED ACTION

Response to Amendment

In response to the office action mailed on 10/5/05 the Applicant has amended claims 1,3-5 and cancelled claim 2. Currently claims 1,2-5 are pending.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,3-5 are provisionally rejected on the ground of nonstatutory double patenting over claims 1,2,6,8 of copending Application No. 2005/0145243A1. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application

Art Unit: 3743

since the referenced copending application and the instant application are claiming common subject matter, as follows:

- Claim 1 reads on claim 1, and limitations of the “valve” reads on limitations cited in claims 2,6, and 8 of the pending application ‘0145243A1
- Claim 3 reads on claim 1 “supplementary or secondary channel” of the pending application ‘0145243A1
- Claim 4 reads on claim 1 of the pending application ‘0145243A1
- Claim 5 reads on claim 1 of the pending application ‘0145243A1

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent no. 3,063,461 is cited to show “shutter” valve see figures 1-8 where the valve as disclosed in columns 2-4 defines over the applicant valve configuration of claim 1. Therefore, it would have been obvious to one of ordinary skills in the art to replace valve structure of the prior art nebulizing device i.e. US 6,044,841 (as cited by the applicant, PTO-1449) in view of US patent no. 3,063,461 to Rudolph for the purposes of providing a valve and valve elements which are characterized by their low resistance to the action and the spring

Art Unit: 3743

elements are highly resilient to operate with a minimum pressure differential (see col.4 lines 57-62).
